You can access the website on your  
desktop, laptop, tablet or smartphone

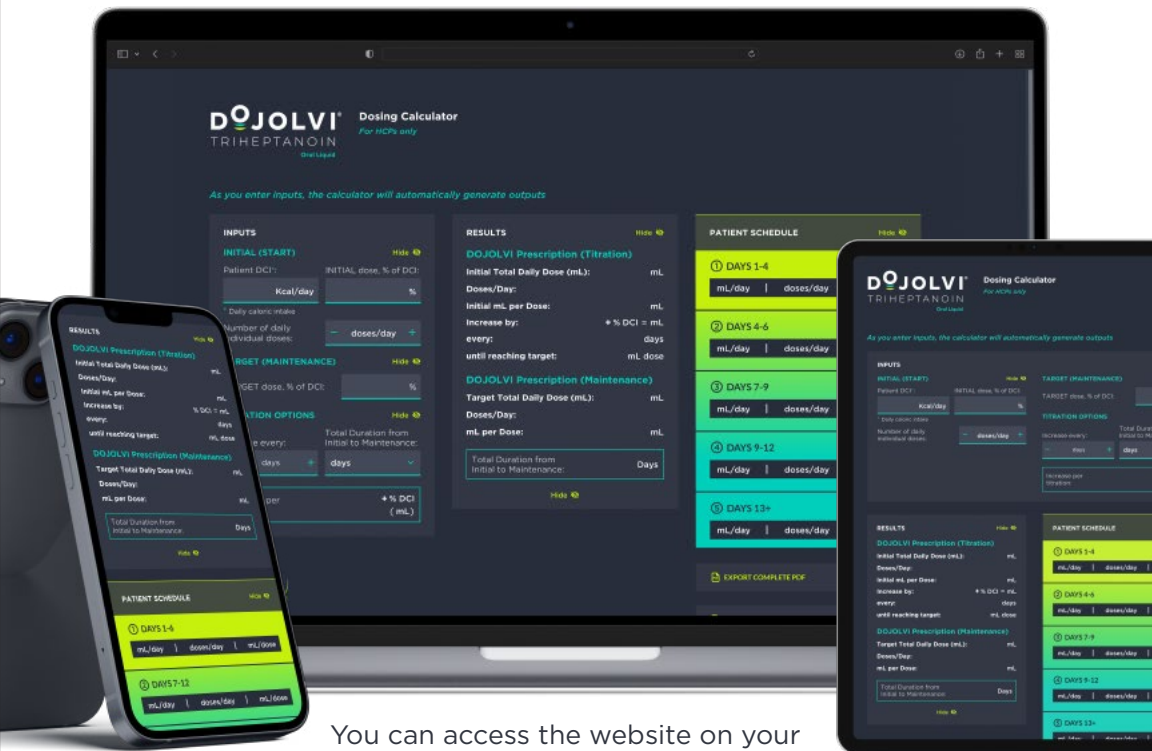

# DOJOLVI<sup>®</sup>

## TRihePTANOIN

Oral Liquid

# Dosing Calculator

For HCPs only

You can access the website on your desktop, laptop, tablet or smartphone

## Designed to help you calculate the DOJOLVI daily dosing schedule for your patients.

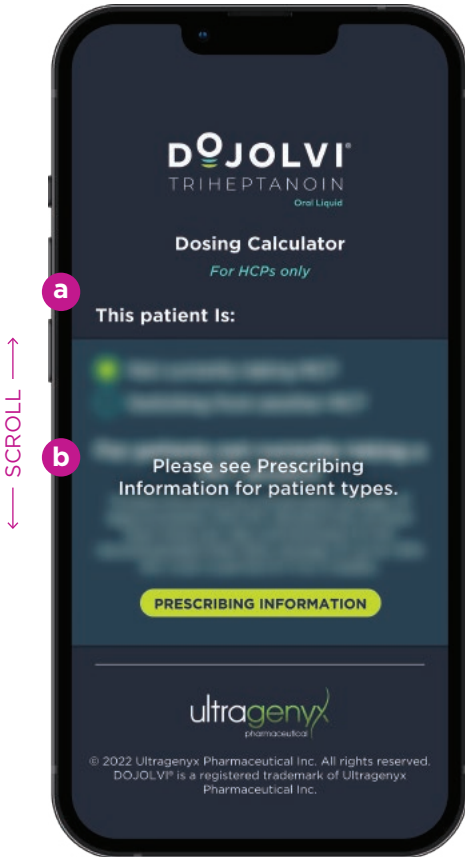

- Works for all patients ready to start DOJOLVI
- Calculates:
  - initial dose
  - target dose
  - titration doses
- Exports a PDF:
  - ***for your files*** showing all inputs, outputs and a patient schedule
  - ***for your patient*** with mL/dose and daily dose schedule for entire titration period

# 1. Select your patient type

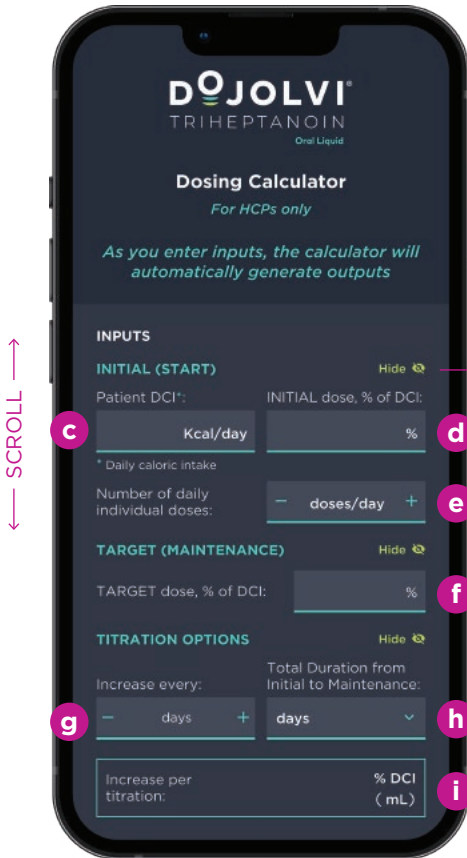

*It is best to review this guide while using the calculator*

You will be asked to confirm you are a Healthcare Professional before using

- a** Patient type selection
- b** Relevant dosing recommendations provided from the Prescribing Information (PI)  
Full PI available for review

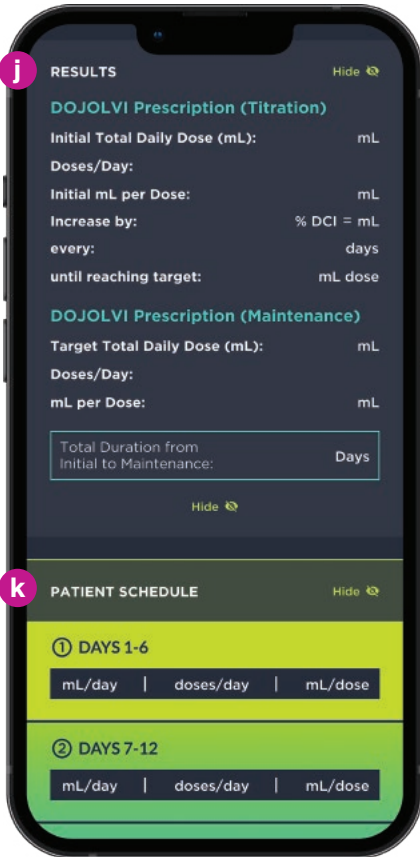

## 2. Enter the values for dosing information

Show/Hide buttons to open/close sections

- c** DCI (daily caloric intake)
- d** INITIAL dose, % of DCI
- e** Number of doses per day
- f** TARGET dose, % of DCI
- g** Increase every # days
- h** Total duration (multiples of the # of days selected in part g)
- i** Calculates in real time based on inputs above

### 3. Review results and patient schedule

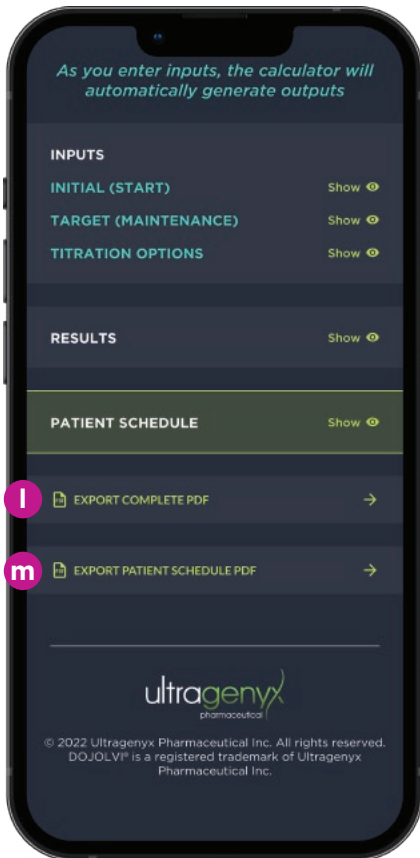

**j** Results section will populate in real time as you enter inputs

**k** Patient schedule shows relevant information for your patient

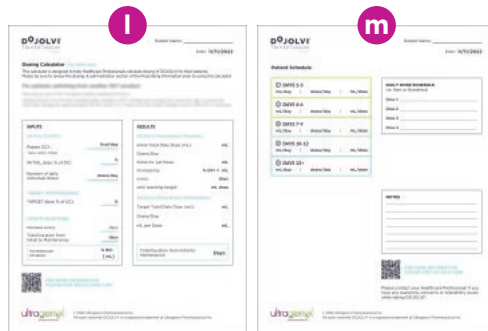

## 4. Download and share results

SCROLL ↑

**i** Complete PDF of all inputs, outputs and the patient schedule *for your files*

**m** Patient schedule PDF *for your patient* (you can handwrite or type notes and a daily dose schedule)
